Legislative Update #22

July 16, 2019

Effective 10/1/2019 [Public Act 19-191 An Act Concerning Opioid Use](#) makes changes in CT General Statutes that address the opioid crisis. As the behavioral health community will be impacted by this bill I am providing a summary. The Act:

- Requires pharmacists to offer consultations to all patients when dispensing a prescription.
- Allows pharmacists to designate a trained pharmacy technician to access the state's Connecticut Prescription Monitoring and Reporting System (CPMRS) on their behalf.
- Requires drug manufacturers and wholesalers to report to the Department of Consumer Protection on decisions to terminate or refuse an order from a pharmacy or prescribing practitioner for schedule II to V controlled substances.
- Prohibits life insurance and annuity policies or contracts from excluding coverage solely based on an individual having received a prescription for naloxone (an opioid antagonist).
- Requires prescribing practitioners who prescribe an opioid drug with more than a 12-week supply to establish a treatment agreement with the patient or discuss a care plan for chronic opioid drug use.
- Requires DMHAS to review and report on literature about the efficacy of providing home-based treatment and recovery services for opioid use disorder to certain Medicaid beneficiaries.
- Requires DMHAS-operated or –approved treatment programs to educate patients with opioid use disorder, and their relatives and significant others, on opioid antagonists and how to administer them.
- Require emergency medical services personnel to complete (a) mental health first aid training and (b) national training and examination requirements.
- Requires hospitals, starting January 1, 2020, to administer a mental health screening or assessment on patients treated for a nonfatal opioid drug overdoses if it is medically appropriate to do so.
- Requires DMHAS to study and report on the protocol for police detention of someone suspected of overdosing on an opioid drug and the implications of involuntarily transporting such a person to an emergency department

Additionally, the Act also requires higher education institutions, by January 1, 2020, to develop and implement a policy on the availability and use of opioid antagonists by students and employees, and generally notify emergency medical providers when an opioid antagonist is used.
